#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1<sup>u</sup> rejected under 35 U.S.C. 102(e) as being clearly anticipated by Dimenstein. Dimenstein discloses "...a system for decrypting a file..." and that "...a PC peripheral... may serve as a decryption device...." This statement, in conjunction with the rest of the application, inherently discloses:

a computing platform for processing encrypted or encoded digital data, said computing platform including a peripheral bus and configured to run audio or video playback application software and pass said encrypted or encoded digital data to said peripheral bus configured so as to be not-accessible by said audio or video playback software (see column 3, lines 15-33 and lines 32-45 and column 4, lines 10-14);

a peripheral coupled to said peripheral bus configured to decrypt or decode said encrypted or encoded digital data and generate a decoded or decrypted output signal (see column 3, lines 20-21 and lines 46-63 and column 4, lines 9-16).
